Tony In Joshua Foer's book Moonwalking with Einstein Joshua raves about Tony's memory skills and his use of the Memory Palace to do so So I was intrigued to learn about memory techniques and found Tony's book While perhaps I purchased too quickly as it was not about the Memory Palace but rather Mind Mapping I was still intrigued so I read it After the first 25% of the book providing an introduction I was expecting to learn how to create a memory map Ditto after 50% Ditto after 80% But all it was until that point was just bravado about how Mind Mapping can be used for everything known to mankind short of curing cancer although giving Tony pages I am sure he would take credit for that I won't fault Tony but the Kindle version is useless After 80% of the book when he finally and I say finally with exasperation gets into creating a memory map and showing examples it is impossible to read on a Kindle My next step is going online to see what he was talking about I don't doubt Tony's memorization skills nor that a Mind Map is a valuable tool in some and even many applications But I was extremely disappointed with the book and had I known and was interested in the subject of Mind Mapping I would search for another author that can skip to the chase and explain what it is and how to use it Note I'd give it 1 star but I did see Mind Maps in the book so I will go online to see what they are Mind Map Mastery: The Complete Guide to Learning and Using the Most Powerful Thinking Tool in the Universe by Buzan.
