An outstanding book for those hobbyist (I wouldn't recommend this for folks who have never sold anything on eBay) eBayers that are considering setting up a formal business on eBay. It explains the mechanics of planning and initiating your business using automation tools to improve productivity selecting shipping vendors setting up accounting/bookkeeping systems dealing with taxes and much more. My only complaint is that the author does tend to focus on individuals that wish to create a full-time business so you need to carefully evaluate how to best modify some of the advice if you are only looking to create some supplemental income. Titanium eBay: A Tactical Guide to Becoming a Millionaire PowerSeller is for everyone who aspires to reach the highest level of success within eBay whether they've been selling through eBay for years at the Platinum level and want to learn how to grow their business or they're just starting out with ambitious plans. With over 60 chapters coverage includes:

- Organization
- Product selection and pricing
- Advanced listing and selling strategies
- Auction management
- Brand building
