This is in my top five of all-time favorite books on the writing craft. **Chapter After chapterhouse cafe** Hardcover Books On Writing is one of my favorite genres: YES I know I should be working on my own book but it's so much more fun to read about how others write theirs! I gravitate toward those that feature practical craft advice over woo-woo hand-holding: more SCENE AND STRUCTURE by Jack Bickham less WRITING DOWN THE BONES by Natalie Goldberg. **PDF Chapter After chapter 11** CHAPTER AFTER CHAPTER doesn't shrink from a graphic description of the seriously hard (and seriously real) work involved in writing (if you teared up a bit at the part in ON WRITING where King bluntly states if you don't want to work your ass off you have no business trying to write well--settle back into competency and be grateful you have even that much to fall back on then you will require weeks of therapy after reading this book) but this very same honesty about (one author's) writing process results in a detailed blueprint of an often joyless trudge through endless rewrites that makes one wonder if Sellers should perhaps consider another line of work:
