There is now over 100 years of documented history and research on the Polio virus and whether or not its treatment by inoculation has been successful in eradicating Polio. I am suggesting in this article that there are significant findings based on historical and past and current research including my own research that the theory of Polio and possibly other modern day diseases such as Post Polio Syndrome Polio Vaccine Induced Paralysis Legionnaires CNS disease Cancer and AIDS may be caused by acidic chemical poisoning from DDT (dichloro diphenyl trichloroethane) and other related DDT pesticides acidic vaccinations and other factors including lifestyle and dietary factors rather than from a lone infectious Poliovirus. The following ten graphs outline the history of Polio the production of DDT BHC Lead Arsenic Polio vaccinations and the author's theory that chemical poisoning vaccination and lifestyle and dietary choices are a likely cause for the symptoms of Polio neurological diseases Cancer and AIDS: THE POSSIBLE CAUSE OF POLIO POST-POLIO CNS PVIPD LEGIONNAIRES AIDS and the CANCER EPIDEMIC - MASS ACIDIC CHEMICAL POISONING?
